## Power Solutions International Launches 3.4-Liter and 29.2-Liter Engines at POWER-GEN

WOOD DALE, Ill., Dec. 08, 2015 (GLOBE NEWSWIRE) -- Power Solutions International, Inc. ("PSI") (NASDAQ:PSIX) presents its latest industrial and heavy-duty power systems at the 2015 POWER-GEN International Trade Show, to be held December 8-10 in Las Vegas, Nevada. Top highlights for the company include the PSI-built 3.4-liter and 4.3-liter engines and its new 29.2-liter heavy-duty engine.

"With 50 and 60hz products, ranging from 20 kWe to 1.2 MW of power, we're presenting our most complete and advanced product range yet at this year's POWER-GEN," said Jeremy Lessaris, PSI Vice President of Marketing and Communications. "The 3.4-liter, 4.3-liter and 8.8-liter engines that we're showcasing offer unprecedented power in their class."

PSI designed the 3.4-liter and 4.3-liter systems to provide greater efficiency and power than previous engines. The new 3.4-liter engine delivers power in the range of 30-60 kWe, while the 4.3-liter model has a power range of 40-50 kWe. Both engines are available for stationary and mobile applications.

PSI is also featuring its 8.8-liter engine, which offers an extended power range up to 180 kWe. The company's industrial line also includes .97-liter, 3.0-liter and 5.7-liter engines.

Mr. Lessaris noted that PSI offers OEMs the most extensive product line in the industry, with expanded standby, prime and continuous power ratings. This year, the company is showcasing a new 29.2-liter industrial stationary engine rated at 550 kWe/60Hz. The new engine includes enhancements for prime and continuous power, dual-fuel auto switchover, brushless alternators, a serpentine self-tensioning fan belt, and advanced diagnostics for improved uptime.

PSI is also providing new lean-burn standby and prime ratings for all of its heavy-duty engines. The PSI Heavy-Duty line also includes 8.1-liter, 11.1-liter, 14.6-liter, 18.3-liter and 21.9-liter models, all of which offer NFPA 110.1 and UL2200 compliance and advanced controls and emission systems.

PSI's industrial and heavy-duty engines will be presented at booth #5507 at the POWER-GEN International Trade Show, December 8-10 in Las Vegas, Nevada.

### About Power Solutions International, Inc.

Power Solutions International, Inc. (PSI) is a leader in the design, engineering and manufacture of emissions-certified, alternative-fuel power systems. PSI provides integrated turnkey solutions to leading global original equipment manufacturers in the industrial and on-road markets. The Company's unique in-house design, prototyping, engineering and testing capacities allow PSI to customize clean, high-performance engines that run on a wide variety of fuels, including natural gas, propane, biogas, diesel and gasoline.

PSI develops and delivers complete .97 to 29-liter power systems, including the 8.8-liter engine aimed at the industrial and on-road markets, including medium duty fleets, delivery trucks, school buses, RV and commercial chassis. PSI power systems are currently used worldwide in power generators, forklifts, aerial lifts, and industrial sweepers, as well as in oil and gas, aircraft ground support, arbor, agricultural and construction equipment.
