## CAUTIONARY NOTES

This presentation has been prepared by Power Solutions International, Inc. (PSI) for investors, solely for informational purposes. The information contained in this presentation does not purport to be all-inclusive or to contain all of the information a prospective or existing investor may desire. All of the financial information and other information regarding PSI contained in this presentation (including any oral statements transmitted to the recipients of this presentation) is qualified in its entirety by PSI's filings with the Securities and Exchange Commission (SEC), including the financial statements and other financial disclosure contained in those filings. PSI makes no representation or warranty as to the accuracy or completeness of the information contained in this presentation (including any oral statements transmitted to the recipients of this presentation).

This presentation (including any oral statements transmitted to the recipients of this presentation) contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements regarding PSI's current expectations about its future operating results, prospects and opportunities. PSI has tried to identify these forward looking statements by using words such as "expect," "anticipate," "estimate," "plan," "will," "would," "should," "believe" or similar expressions, but these words are not the exclusive means for identifying such statements. PSI cautions that a number of risks, uncertainties and other important factors could cause PSI's actual results, prospects and opportunities to differ materially from those expressed in, or implied by, the forward-looking statements, including, without limitation, the development of the market for alternative-fuel systems, technological and other risks relating to PSI's development of its new 8.8 liter engine, introduction of other new products and entry into on-road markets (including the risk that these initiatives may not be successful), changes in environmental and regulatory policies, significant competition, PSI's dependence on key suppliers and general economic conditions. For a detailed discussion of factors that could affect PSI's future operating results, prospects and opportunities, please see PSI's Form 10-K for the year ended December 31, 2014, as filed with the SEC, and PSI's other SEC filings, including the disclosures under "Risk Factors" and "Cautionary Note Regarding Forward-Looking Statements" in the SEC filings. You should not place undue reliance on any forward-looking statements. Except as expressly required by the federal securities laws, PSI undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, changed circumstances or future events or for any other reason.

The Company believes supplementing its consolidated financial statements presented in accordance with GAAP measures provides investors with useful information regarding the Company's short-term and long-term trends. Adjusted net income is derived from GAAP results by excluding the non-cash impact related to the change in the estimated fair value of the liability associated with the warrants issued in the Company's April 2011 private placement. The Company excludes this non-operating, non-cash impact, as the Company believes it is not indicative of its core operating results or future performance. The warrant revaluation results from facts and circumstances that fluctuate in impact and is excluded by management in its forecast and evaluation of the Company's operational performance. Adjusted earnings per diluted common share is also derived from GAAP results by excluding the non-cash impact, even when antidilutive, related to the change in the estimated fair value of the liability associated with the warrants. Adjusted net income and adjusted earnings per diluted common share for 2014 include an adjustment to remove the revaluation of the contingent consideration liability recorded in connection with the Company's acquisition of 3PI, which was completed on April 1, 2014. The Company believes that this non-cash impact on earnings, is not indicative of the Company's core operating results or future performance. Adjusted net income and adjusted earnings per diluted common share also include an adjustment to remove transaction costs incurred in association with the Company's acquisitions in 2014 and 2015 and loss on debt extinguishment associated with the Company's change to a new credit facility in 2013. The Company believes that these costs are not indicative of the Company's core operating results or future performance. These costs are excluded by management in its forecast and evaluation of the Company's operational performance.

Adjusted net income, adjusted earnings per diluted common share and other non-GAAP financial measures used and presented by the Company may be calculated differently from, and therefore may not be comparable to, similarly titled measures used by other companies. Investors should consider non-GAAP measures in addition to, and not as a substitute for, or as superior to, financial performance measures prepared in accordance with GAAP.
