

## Power Solutions International Set to Join Russell 3000®, Russell 2000®, and Russell Microcap® Indexes

June 9, 2025

WOOD DALE, Ill., June 09, 2025 (GLOBE NEWSWIRE) -- Power Solutions International, Inc. (the "Company" or "PSI") (Nasdaq: PSIX), a leader in the design, engineering and manufacture of emission-certified engines and power systems, announced today that it has been tentatively named to the Russell 3000®, Russell 2000® and Russell Microcap® indexes, according to a preliminary list of additions posted by FTSE Russell on June 6. Final inclusion is expected to take effect after the U.S. market opens on June 30, 2025. In addition to the Russell 3000®, Russell 2000® and Russell Microcap® indexes, the company was added to the Morgan Stanley Capital International (MSCI) US Small Cap Index after the market opened on May 30.

The annual reconstitution of the Russell US indexes captures the 4,000 largest US stocks as of April 30, ranking them by total market capitalization. Membership in the Russell 3000® Index, which remains in place for one year, means automatic inclusion in the large-cap Russell 1000 Index or small-cap Russell 2000 Index as well as the appropriate growth and value style indexes. FTSE Russell determines membership for its Russell indexes primarily by objective, market-capitalization rankings and style attributes.

Russell indexes are widely used by investment managers and institutional investors for index funds and as benchmarks for active investment strategies. According to data as of the end of June 2024, about \$10.6 trillion in assets are benchmarked against the Russell US indexes, which belong to FTSE Russell, the global index provider.

The MSCI USA Small Cap Index is designed to measure the performance of the small cap segment of the US equity market. With 1,695 constituents, the index represents approximately 14% of the free float-adjusted market capitalization in the US.

"We are honored to be considered for the Russell 3000®, Russell 2000®, Russell Microcap® indexes and the MSCI US Small Cap Index. These preliminary inclusions reflect the continued progress we're making in strengthening our business and delivering value to our customers and shareholders," said Dino Xykis, Chief Executive Officer of Power Solutions International. "This milestone highlights PSI's growing presence in the power systems, data center products, and industrial engine markets, and we believe it will enhance our visibility with a broader base of institutional and retail investors as we continue executing on our strategic initiatives."

### **Fiona Bassett, CEO of FTSE Russell, an LSEG business, comments:**

*"The Russell indexes have continuously adapted to the evolving dynamic US economy, and it's crucial to fully recalibrate the suite of Russell US Indexes, ensuring the indexes maintain an accurate representation of the market. The transition to a semi-annual reconstitution frequency from 2026 will ensure our indexes continue to represent the market and maintain the purpose of the index as a portfolio benchmark."*

### **About Power Solutions International:**

Power Solutions International, Inc. (PSI) is a leader in the design, engineering and manufacture of a broad range of advanced, emission-certified engines and power systems. PSI provides integrated turnkey solutions to leading global original equipment manufacturers and end-user customers within the power systems, industrial and transportation end markets. The Company's unique in-house design, prototyping, engineering and testing capabilities allow PSI to customize clean, high-performance engines using a fuel agnostic strategy to run on a wide variety of fuels, including natural gas, propane, gasoline, diesel and biofuels.

PSI develops and delivers complete power systems that are used worldwide in stationary and mobile power generation applications supporting standby, prime, demand response, and microgrid solutions, as well as products and packages supporting the rapidly growing data center markets. PSI's industrial end market provides engine and battery powertrain solutions to serve applications such as forklifts, agricultural and turf, arbor care, industrial sweepers, aerial lifts, irrigation pumps, ground support, and construction equipment. PSI's transportation end market provides engine powertrain solutions to specialized applications such as terminal tractors, port equipment, military vehicles, and other non-road vocational vehicles.
