Power Solutions International Launches Newly Designed 4.3-Liter and 180kW 8.8-Liter Engines at POWER-GEN

ORLANDO, Fla., Dec. 8, 2014 (GLOBE NEWSWIRE) -- Power Solutions International, Inc. (PSI) (Nasdaq:PSIX), leader in the design, engineering and manufacture of emissions-certified alternative-fuel and conventional power systems, presents its latest industrial and heavy-duty power systems at the 2014 POWER-GEN International Trade Show, to be held December 9-11 in Orlando, Florida. PSI's top highlights are its newly designed 4.3-liter industrial engine and its 8.8-liter industrial engine, featuring a significantly increased power range. The company is also showcasing new features for its updated Heavy-Duty engine family.

PSI's all-new 4.3-liter engine has been designed from the ground up. The fuel-flexible engine is more efficient and more powerful than similar displacements in the market, offering a power range of 35-50 kW.

PSI's already successful 8.8-liter "big block" engine now features an extended power range to 180 kW. The unit will come with enhanced features in 2015, including: a new closed crankcase ventilation system, offering reduced oil consumption and excellent cold ambient ability; a spark plug heat shield for better durability; a new oil pan and an engine-mounted catalyst.

"We're very excited about launching these breakthrough products at POWER-GEN this year," said Jeremy Lessaris, PSI Global Director of Marketing and Communications. "The 4.3-liter and 8.8-liter engines both offer unprecedented power with no sacrifice on performance or durability."

In addition, PSI will display its 5.7-liter General Motors industrial engine and .97-liter, as well as its 11.1-liter, 14.6-liter and 21.9-liter Heavy-Duty power systems. The Heavy-Duty engine family, which also includes 8.1-liter and 18.3-liter units, now features all-new advanced controls and emission systems on all models.

PSI's industrial and Heavy-Duty engines will be showcased at PSI's booth (#1910), as well as at the booths of numerous OEMs throughout the POWER-GEN International Show.

About Power Solutions International, Inc.

Power Solutions International, Inc. (PSI) is a leader in the design, engineering and manufacture of emissions-certified, alternative-fuel power systems. PSI provides integrated turnkey solutions to leading global original equipment manufacturers in the industrial and on-road markets. The company's unique in-house design, prototyping, engineering and testing capacities allows PSI to customize clean, high-performance engines that run on a wide variety of fuels, including natural gas, propane, biogas, diesel and gasoline.

PSI develops and delivers complete .97 to 22-liter power systems, including the 8.8-liter engine aimed at the industrial and on-road markets, such as medium duty fleets, delivery trucks, school buses and garbage/refuse trucks. PSI power systems are currently used worldwide in power generators, forklifts, aerial lifts, and industrial sweepers, as well as in oil and gas, aircraft ground support, agricultural and construction equipment.

PSI recently acquired Professional Power Products, Inc. (3PI), a leading designer and manufacturer of large, custom-engineered, integrated electrical power generation systems serving the global diesel and natural gas power generation market. 3PI specializes in systems for both standby and prime power applications.
